

Android Studio: Create or import a project

Launch Android Studio and follow these steps to create or import a project.

1. To create a project click New Project.
To import an existing project click Open.

2. Select a template for the new project and click Next.

3. Make changes to the project properties if needed. Choose a minimum SDK level and click Finish.

New Project

Basic Activity

Creates a new basic activity with the Navigation component

Name: My Application

Package name: com.example.myapplication

Save location: C:\Users\Public\Downloads

Language: Kotlin

Minimum SDK: API 24: Android 7.0 (Nougat)

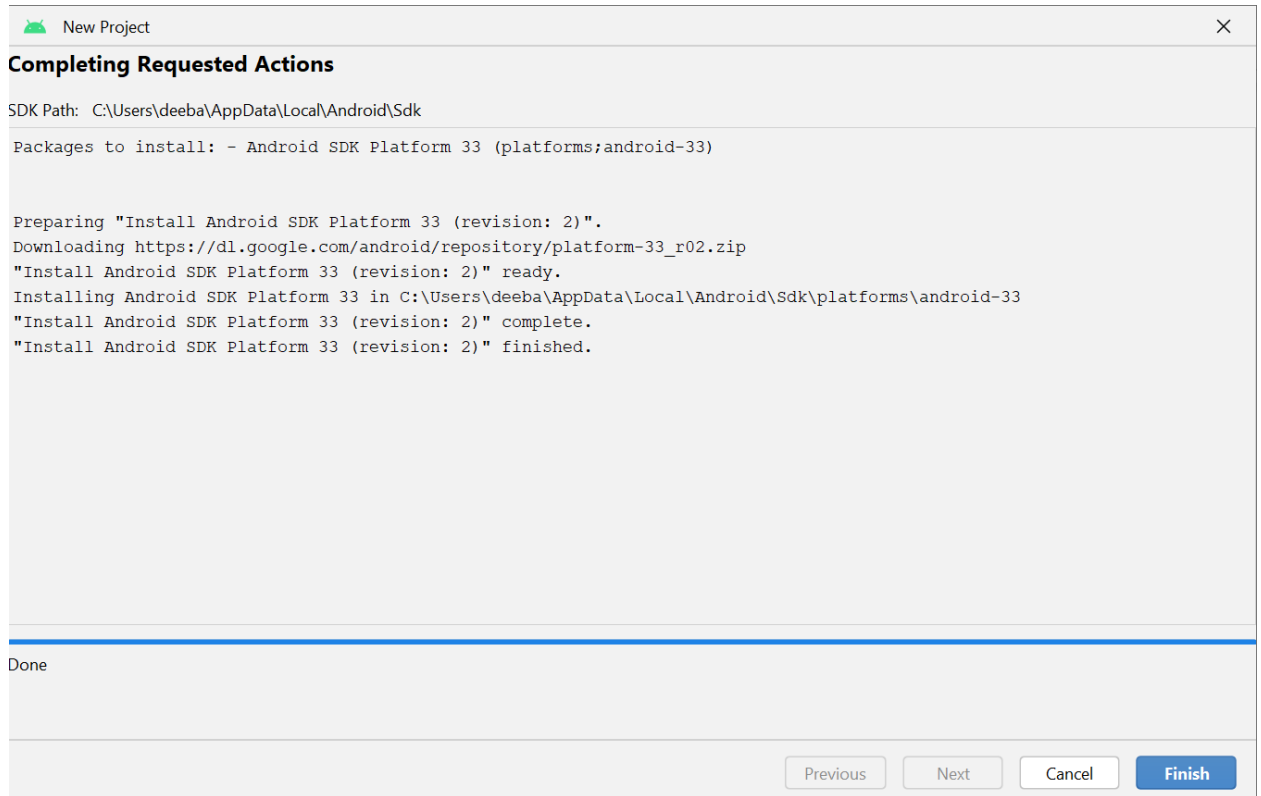

i Your app will run on approximately **94.4%** of devices.
[Help me choose](#)

☐ Use legacy android.support libraries **?**
Using legacy android.support libraries will prevent you from using the latest Play Services and Jetpack libraries

⚠ 'Downloads' already exists at the specified project location and it is not empty.

Previous Next Cancel **Finish**

4. When Android Studio is done installing the required SDK files click Finish.

You can now write the application code.
